- Techserve Alliance (Formerly NACCB)
- Northern Ohio Software Quality Assurance Association (NOSQAA)
- Council of Smaller Enterprises (COSE)

# Providing technical talent for your changing world.

## Delivery of contract IT resources – On Demand

### Staff Augmentation

Visium Resources provides cost effective solutions for staffing all your important information technology projects.

### Network Infrastructure

Today, your organization's network is a mission critical component of your business. Visium Resources has the experienced engineers and support technicians to help you plan, build, maintain and enhance your network. Our resources ensure that scalability, total cost of ownership, security and availability are managed according to your business needs and budget.

For all your network connectivity needs, Visium Resources has the experience to support you every step of the way.

Visium Resources offers a full range of networking technicians including:

- Network Engineers - CISCO
- IT Security - ASA-PIX-Checkpoint-Juniper
- Installation & Configuration
- Unified Communications/Telephony - CISCO Call Manager - Aspect - Avaya
- Backup & Archival Solutions
- Training

### Desktop/End User Device Support Services

Visium Resources provides technical staffing solutions for your desktop/EUD support group, in both hardware and software operations and maintenance. Our system configuration and hardware/software technicians bring to your project years of expertise in support, break-fix and equipment rollout projects.

### Application Development

Visium Resources provides technical staffing solutions for your Application Development requirements. We can provide a developer or a team of developers. Our team has skills in Java, Application Servers, eBusiness/web application development, HTML, JavaScript, Microsoft .Net, Sharepoint, Oracle, AS400/RPG and Mainframe Cobol. Our resources are capable of maintaining your existing applications or developing new applications to support your business needs. We are also experienced with the reporting tools on the market today (Cognos, BusinessObjects, MicroStrategy, Oracle Reports). With Visium Resources, you can hand over staff augmentation needs for your application development or support projects, and direct your focus towards your core business.

### DB/OS Administration

The need for high quality database and system administration is greater than ever before. Visium Resources can provide the expert technical support that is essential for the successful organization and operation of today's large and complex database and system environments.

Our technical support services consist of Relational Database Administrators (Oracle, MS SQL Server, Sybase, DB2, etc.) and Operating System Administrators in all varieties of UNIX.

### Help Desk Services

Visium Resources provides technical staffing solutions for your internal helpdesk, in both software and hardware operations and maintenance. Our LAN/WAN administrators, together with our system configuration and hardware technicians bring to your project years of experience in all major hardware and related database environments.

### Contract Management

Visium Resources will assist client contracts, purchasing, or human resources by providing on-site administration to coordinate the hiring of contract/temporary employees (including additional vendor subcontracting as required).

When staffing a project with Visium Resources, you hand over to us the following responsibilities:

- Employment searches and processing
- Project administration
- Management services for temporary and contract employees

This process remains a powerful means to reduce the number of vendors, streamline billing to provide better client control and to reduce the cost of your project.

### Enterprise Resource Planning

Whether you're using Oracle, SAP, PeopleSoft or another ERP package, Visium Resources can help with implementation and customizations. Our resources have the functional and technical skills to implement or upgrade your ERP.

### Outsourcing

- Helpdesk services
- Desktop/end user device support services
